

### **Nathan Rearick and Teammate Dad**

**Nathan Rearick:** Nathan is a high schooler with CP and a brain-malformation called polymicrogyria (PMG). He has a very pleasant disposition but was told very young he would never walk, talk, or do much of anything on his own. He works hard to prove those who doubt him wrong. He started his racing career in 2015, riding with his dad (Kevin), through the generosity of many friends who crowd-sourced their own racing stroller.
